

Amendment to the Claims:

The listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A method for scaling an option list of an application on an application user interface of a mobile terminal device, which option list includes options chosen from a given set of options, comprising the following steps:

detecting a displayed size of the application on said application user interface; determining a number of options included in said option list ~~depending which are dependent upon the displayed a size of a display of the options by the user interface of the application~~ and fitting the application having said displayed size in the display; and

displaying the option list containing said determined number of options within the application on said application user interface on the display.

2. (Currently Amended) A method according to claim 1, comprising further a step of detecting a resolution and/or size of said application user interface and re-scaling the displayed size of the application accordingly.

3. (Currently Amended) A method according to claim 1, where at least an one option is ~~always included into said option list, this option displaying all options of said given set of options,~~ if the at least one option is chosen.

4. (Currently Amended) A method according to claim 2, where at least an one option is ~~always included into said option list, this option and displaying all options of said given set of options,~~ if the at least one option is chosen.

5. (Currently Amended) A method according ~~any one to~~ claim 1, further comprising a step of removing at least one option from said option list if the size of the display of the application decreases, so as to adapt said number of options in said option list to the size of the display of the application.

6. (Currently Amended) A method according ~~any one to~~ claim 2, further comprising a step of removing at least one option from said option list if the size of the display of the application decreases, so as to adapt said number of options in said option list to the size of the display of the application.

7. (Currently Amended) A method according ~~any one to~~ claim 3, further comprising a step of removing at least one option from said option list if the size of the display of the application decreases, so as to adapt said number of options in said option list to the size of the display of the application.

8. (Currently Amended) A method according ~~any one to~~ claim 1, further comprising a step of adding at least one additional option selected from said given set of options to said option list if ~~the a~~ size of the display of the application increases, so as to adapt said number of options in said option list to said size of the display of the application.

9. (Currently Amended) A method according ~~any one to~~ claim 2, further comprising a step of adding at least one additional option selected from said given set of options to said option list if ~~the a~~ size of the display of the application increases, so as to adapt said number of options in said option list to said size of the display of the application.

10. (Currently Amended) A method according ~~any one to~~ claim 3, further comprising a step of adding at least one additional option selected from said given set of options to said option list if ~~the a~~ size of the display of the application increases, so as to adapt said number of options in said option list to said size of the display of the application.

11. (Currently Amended) A method according ~~any one of~~ to claim 5, further comprising a step of adding at least one additional option selected from said given set of options to said option list if ~~the~~ a size of the display of the application increases, so as to adapt said number of options in said option list to said size of the display of the application.

12. (Currently Amended) A method according ~~any one of~~ to claim 1, wherein said number of options in said option list adapts dynamically if a user scales the application or said application user interface.

13. (Currently Amended) A method according ~~any one of~~ to claim 2, wherein said number of options in said option list adapts dynamically if a user scales the application or said application user interface.

14. (Currently Amended) A method according ~~any one of~~ to claim 3, wherein said number of options in said option list adapts dynamically if a user scales the application or said application user interface.

15. (Currently Amended) A method according ~~any one of~~ to claim 5, wherein said number of options in said option list adapts dynamically if a user scales the application or said application user interface.

16. (Currently Amended) A method according ~~any one of~~ to claim 8, wherein said number of options in said option list adapts dynamically if a user scales the application or said application user interface.

17. (Currently Amended) A method according ~~any one of~~ to claim 1, wherein said number of options in said option list adapts dynamically if the user connects the mobile terminal device to ~~an~~ at least one of an additional display and/or an external display.

18. (Currently Amended) A method according ~~any one of~~ to claim 2, wherein said number of options in said option list adapts dynamically if the user connects the mobile terminal device to ~~an~~ at least one of an additional display and/or an external display.

19. (Currently Amended) A method according ~~any one of~~ to claim 3, wherein said number of options in said option list adapts dynamically if the user connects the mobile terminal device to ~~an~~ at least one of an additional display and/or an external display.

20. (Currently Amended) A method according ~~any one of~~ to claim 5, wherein said number of options in said option list adapts dynamically if the user connects the mobile terminal device to ~~an~~ at least one of an additional display and/or an external display.

21. (Currently Amended) A method according ~~any one of~~ to claim 8, wherein said number of options in said option list adapts dynamically if the user connects the mobile terminal device to ~~an~~ at least one of an additional display and/or an external display.

22. (Currently Amended) A method according ~~any one of~~ to claim 12, wherein said number of options in said option list adapts dynamically if the user connects the mobile terminal device to ~~an~~ at least one of an additional display and/or an external display.

23. (Currently Amended) A method according to claim 1, where said given set of options includes context sensitive options.

24. (Currently Amended) A method according to claim 1, where said options in said option list are ordered by their frequency of use.

25. (Currently Amended) A computer program stored on a storage medium for scaling an option list of an application on an application user interface of a mobile terminal device, which option list includes options chosen from a given set of options, said computer program when executed causes said mobile terminal to perform the steps of:

detecting a displayed size of the application on said application user interface; determining a number of options included in said option list ~~depending on the displayed~~ which are dependent upon a size of a display of the options by the user interface of the application and fitting the application having said displayed size in the display; and displaying the option list containing said determined number of options within the application on said application user interface on the display.

26. (Currently Amended) ~~Mobile~~ A mobile terminal device for supporting application user interfaces of at least one of different resolution and/or size, comprising:

a display for displaying the application user interface;

a detecting means for detecting at least one of the resolution and/or size of said application user interface and ~~the size of applications on~~ said application user interface; and

~~a scaler means~~ for scaling for operating with said application user interface and applications ~~on of~~ said application user interface for scaling a number of options of an option list fitting said at least one of resolution and/or size.

27. (Currently Amended) ~~Mobile~~ A mobile terminal device according to claim 26, ~~further~~ comprising:

an application on said application user interface having an option list, which number of options is scaled by the scaler means;

wherein said ~~scaler means~~ for scaling detects a displayed size of the application on said application user interface, determines a number of options included in said option list depending on the displayed size of the application and ~~fitting fits~~ the application having ~~said the displayed size~~ to the display, and displays

the option list containing said determined number of options within the application on said application user interface on the display.

28. (Currently Amended) ~~Communication~~ A communication system comprising:

- at least one mobile terminal device according to claim 26; and
- an access point in mobile communication for said mobile terminal device and forming part of a network.

29. (Original) A communication system comprising:
at least one mobile terminal device according to claim 27; and
an access point in mobile communication for said mobile terminal device and forming part of a network.

30. (Original) A communication system according to claim 28, further comprising:
a network; and
a server connected to said network.

31. (Original) A communication system according to claim 29, further comprising:
a network; and
a server connected to said network.

32. (Original) A communication system according to claim 29, further comprising:
a connection from said access point or said server to the Internet.

33. (Original) A communication system according to claim 30, further comprising:
a connection from said access point or said server to the Internet.

34. (Original) A communication system according to claim 31, further comprising:

a connection from said access point or said server to the Internet.

35. (New) A method in accordance with claim 3 wherein the at least one option is always included in said option list.

36. (New) A method in accordance with claim 4 wherein the at least one option is always included in said option list.
